

Trim Tech Partners with Lanlogic and SonicWALL to improve Security

To accelerate its rapid growth, commercial contractor Trim Tech engaged Lanlogic to deploy a secure infrastructure from SonicWALL that provides high-performance connectivity and protection for its broadband network. A comprehensive set of security solutions provides Trim Tech with the ability to deliver improved employee productivity, customer satisfaction, and component supplier workflow while insulating them from exposure to malware, loss of vital data, or vulnerability from email threats.

TRIM TECH SPECIALIZES IN ARCHITECTURAL DOORS, FRAMES AND HARDWARE

Since 1986, Trim Tech, Inc. has been a leading commercial subcontractor specializing in the sales, distribution and installation of architectural doors, frames and hardware in the San Francisco Bay Area. The firm has grown to nine outlets, providing services to general contractors, owners and property managers for industrial, commercial, tenant improvement, and public work projects such as hospitals and schools. Maintaining employee productivity and customer service levels, while protecting vital data assets as it continues to expand, is a prime objective for the company.

IMPROVEMENTS TO BROADBAND COMMUNICATIONS SPAWN INTERNET-BORN THREATS

The need for fast transmission of design plans and component specifications, and the distributed nature of Trim Tech's job sites led the company to transition to high capacity T1 broadband communications. While the move to broadband brought immediate communications improvements, it also increased Trim Tech's vulnerability to malware, spam, spyware and other Internet-born threats. With business protection a prime concern, they turned to SonicWALL Gold Medallion partner Lanlogic.

LANLOGIC IMPLEMENTS SONICWALL SECURITY MEASURES TO PROTECT TRIM TECH

Lanlogic deployed a full suite of SonicWALL security appliances and software designed to keep Trim Tech safe and in control of their business data. SonicWALL was the basis for the solution because its products are easy to manage and monitor, the user interface is simple, and they provide the most comprehensive threat protection.

"Business protection is at the top of our mind. As we grow, we have become more dependent on technology and it is critical to have a partner like Lanlogic that looks out for our best interests both in systems advice and in selecting the best infrastructure.

SonicWALL and Lanlogic provided us with the best-integrated performance and at a far better price than competitive offerings. Their products and services give us the peace of mind to focus on running our business and our commitment to service excellence without being distracted by IT or security issues."

Cyndy Thomas
Director of Operations
Trim Tech, Inc.

Powerful, easily managed firewalls, automatic data backup and recovery devices, email security appliances, and secure remote access appliances now protect Trim Tech's head office and branch locations. The scope of Lanlogic's implementation included:

- Upgrading Trim Tech's existing SonicWALL Unified Threat Management firewall to a SonicWALL enterprise solution
- Securing employee remote access with a SonicWALL SSL VPN secure remote access appliance
- Installing three SonicWALL data backup and recovery appliances that protect their key ERP application, Microsoft Dynamics, and provide secure offsite backup at the offices of Trim Tech's CPA's offices.
- Protecting Trim Tech's inbound and outbound email communications with a SonicWALL Email Security appliance

TRIM TECH REAPS IMMEDIATE EMPLOYEE PRODUCTIVITY IMPROVEMENTS AND DATA PROTECTION BENEFITS

The real value of this network is that it supports an immediate improvement in employee productivity, which is the strongest ROI for a business owner. Within the first day of installing the email security appliance, over 35,000 spam emails were blocked, as well as several sophisticated phishing attacks.

The Value of a Trusted Advisor

Lanlogic offers a number of services to help control costs, reduce risk, and achieve peace of mind:
